# **Benefits of diversification**

- 3Q15 in line; weaker O&M earnings mitigated by stellar property performance
- Another three jackup rigs are deferred by 3-4 months with compensation from customers.

• HOLD for decent dividend yield; TP adjusted to \$\$7.40 3Q15 results demonstrated resiliency of a diversified business. Keppel reported net earnings of \$\$363m in 3Q15, bringing 9M15 bottomline to \$\$1.1bn, which made up c.76% of our full-year estimates. O&M PATMI dropped 34% y-o-y and 4% q-o-q to \$\$166m due to a decline in revenue from project deferments and margin contraction of 2.7ppts to 12%. Infrastructure segment was also weaker, with net contribution falling 11% to \$\$34m given the lower contribution from Merlimau Cogen plant after injecting a 51% stake to KIT, and disposal of Keppel FMC. Property segment was the silver lining, registering earnings growth of 57% y-o-y and 24% q-oq to \$\$144m, led by promising overseas property sales predominantly in China and Vietnam and an increase in its stake in Keppel Land.

**Key takeaways from briefing:** 1) Management is cautious as the operating environment remains **challenging** in view of the macro headwinds and low oil prices; 2) **Order book** dwindled from S\$11bn as of end-Jun to S\$10bn as YTD wins have been slow at S\$1.7bn; 3) Keppel accepted requests from Grupo R and Parden to **defer delivery** of three jackup rigs by 3-4 months with some compensation; 4) negotiations with **Sete Brasil** are still ongoing. Construction progress has slowed down pending Sete Brasil's restructuring; 5) **FLNG** remains a bright spot for Keppel. Notice to commence work for the second unit is expected by the end of the year while FEED study for the third unit is advancing. Golar has also initiated talks with Keppel for a potential new contract for a fourth FLNG vessel.

**Maintain HOLD; TP \$\$7.40.** We have trimmed our FY16F earnings by 11% after cutting 2015 order wins by \$\$500m to \$\$2bn and pushed back the commencement of the remaining three Petrobras rigs by another 6 months. While we remain cautious on the rigbuilding outlook in anticipation of sluggish order flow and prevailing deferment and cancellation risks, Keppel's valuation is inexpensive, with the stock trading near its GFC low of 1.1x P/Bv and offering decent dividend yield of 5%. Maintain HOLD. Upside surprise could come from gains from disposals.

### **INVESTMENT THESIS**

### Profile

Keppel is a diversified conglomerate with its core businesses in offshore marine (O&M), property investments and development, and infrastructure-based activities in Singapore and the region. O&M is the largest segment that typically contributes about two-thirds of group revenue. It possesses strong market leadership positions in rigbuilding, particularly for jackups and semi-submersibles, FPSO conversion, FLNG conversion, repair and construction of high-end specialised vessels.

Our TP of S\$7.40 is based on sum-of-parts : (1) O&M

segment is valued at 10x price-to-earnings (PE) ratio on

FY16 earnings, (2) infrastructure is valued at 10x PE on FY16

earnings, (3) Property segment is valued at 0.8x P/BV, and

(4) market values/estimated fair values are used for listed

### Rationale

HOLD for decent dividend yield and potential valueunlocking corporate actions. Keppel remains committed on paying out 50% of its earnings to shareholders. Although DPS could moderate with a potential decline in earnings, yields remain fairly attractive at 5% based on our forecasts. Upside surprises could come from gains from disposal / divestments. In addition, infrastructure should recover with the delivery of all EPC contracts, mitigating the weakness from O&M.

Offshore & Marine business weighing the group down. Order wins in 9M2015 stood at S\$1.6bn, less than half of 9M14's S\$3.6bn and considerably lower than FY12's and FY13's full-year wins of ~S\$10.0bn. Keppel O&M's net orderbook is shrinking, implying declining top-line and earnings ahead. In 3Q15, O&M PATMI dropped 34% y-o-y and 4% q-o-q to S\$166m due to a drop in revenue from project deferments, and margin contraction of 2.7ppts to 12%.

### Property business is a mixed bag; infrastructure should

**bottom out.** Singapore home sales remain subdued, but the Chinese market seems to be picking up. Overall, Keppel sold over 3,130 homes in 9M15, with more than 70% from China alone, marking an improvement over the total of 2,400 sold in FY14. For infrastructure, with the handover of both phases of the Greater Manchester EPC project and the Doha North sewage treatment project having incurred its final provision of just under S\$200m in 2Q15, Keppel Infrastructure should see its profitability improve thereafter.

### Risks

**Competition from foreign yards.** Keener competition from Chinese yards, which are usually aggressive in their pricing and lax with payment terms, as well as Korean peers, may affect order wins and profitability, especially if Keppel starts to offer concessions to protect market share.

**Further deferments possible if oil prices remain subdued**. Since the oil price started declining in mid-2014, we have seen oil majors and asset owners slash capex spending substantially, which has hit the yards hard. Meanwhile, deliveries of newbuilds and conversions already under construction are being delayed – a situation which could worsen if oil prices remain low.
